

Confidential Report: Disillusioned Banker Opens 'Money-Floodgates' to YOU...

"The Whistleblower"

WANTED:

"Novice Crew to 'Rob' Banks Legally...
... With an Inside Job!"

**Are You Ready for a Quick Heist on The World's
'Hidden' Money-Mountain?
Great! The get-away car's about to leave!...**

Hello,

Please forgive the 'cloak and dagger', but I'm going out on a limb by telling you this...

I don't know how 'they' have done it... How do 'they' 'hide' access to the biggest pile of money in the world? How do 'they' manage to fill their fat coffers from it, day after day, while going relatively unnoticed? 'They' have profited for long enough... now it's YOUR turn...

How do I know all this? Who are 'they'?

'They' are the Wall Street fat-cats. *And I used to work for them.*

The next few minutes will expose you to highly sensitive information...

**... If you're NOT interested in retiring from work
within a year (like I did), you should NOT read any
further.**

This is VERY confidential stuff and I only want people who are serious about coming with me on a 'profit-party' like no other. There's nothing illegal or even unethical about this, but I'm about to reveal shocking news which strikes to the heart of 'The Establishment' and world banking... and unlocks access to wealth you never imagined!

Please; you must understand, the 'elite' would NOT be at all happy with me if they knew what I was about to tell you- if they even got the slightest whiff I was about to offer you a piece of the action... because that's considered to be reserved for, well, the 'elite'. That's why we have to tread carefully, as you'll see...

I successfully gate-crashed their little party and can now empower YOU to follow in my footsteps to fast retirement...

**Revealed: Probably The Biggest Red Herring in
History...
... While the World's Been Stock Watching,**

the Elite Quietly Play a Different Game with Different Rules...

Feeling cheated and disillusioned by the stock market? You should be!

Sure, you may have made a good trade... but then lost on another. You win some, you lose some, right? "Hold on for the long term" we're reassured by the banks. Great- let's see where that plan gets folks in the next year or two...

The people on Main St. dutifully pour their hard-earned cash into investment banks on Wall Street to put into the stock market for them... and those investment banks gladly oblige, for a fat fee... which they ***then invest somewhere else!***

I'm no conspiracy theorist, but in my opinion the stock market is really a cunning diversion for the masses... a distraction stopping them from discovering where the consistent money is made... in the world's Money Mountain. When I say "Money Mountain," I mean it... the BIGGEST mountain of money on the planet.

This confidential report is ALL about MONEY... more money than you ever imagined!

And I'd like to be your personal 'sherpa' guiding you right to that mountain of money. Please stay tuned for a few minutes and I'll explain everything. I speak from experience when I say if you want REAL security for you and yours in an increasingly uncertain world, this will be the most important information you ever uncover... information you've been denied until now...

Imagine getting into an exclusive new club through the back door, while dozens of hopeful customers have to wait in vain out the front... behind a velvet rope...

Why My Humble Background Has Opened The Door of Opportunity Wide for YOU... ... The Backdoor into The Elite Club

It's fair to say I wasn't born with a silver-spoon in my mouth- on the contrary. I grew up on a Native American reserve (out of necessity) and my mother had to stitch quilts for a living. It was the only way we could've made it. I don't have a fancy degree from Harvard or Yale. I also had no 'inner contacts' or hand-holding of any type. I got my big-break at a young age when I landed a job as a trader for a large hedge-fund.

I was given the highly regarded full approval by the Securities and Exchange Commission (SEC) and key responsibility for managing large client accounts (\$1-10 million!) while being sworn to confidentiality.

Glamour, money, cars, champagne... the good life. I had it all; it was my dream come true.

But something didn't smell right...

Maybe it was my humble origins, but from the inside, it seemed just the upper echelons of society were enjoying this party while the man in the street was tossed the scraps from the table to keep him quiet. Why were the top institutions keeping this goldmine to themselves?

I don't exaggerate...

This was something 30 times bigger than the stock market and far simpler to make money from...

I hate elitism. I'm from a working-class background and felt distinctly uncomfortable with all this intrigue and non-disclosure. It wasn't just that the *existence* of this money-mountain was being played down by the banks, it was the fact that they mercilessly milked it daily using an incredibly simple to decipher 'code.'

Hidden behind all the market mumbo-jumbo and misinformation lies a *code*. A code ferociously guarded by this 'secret society'!

Now, don't delude yourself about whether these investment banks have hidden agendas. Of course they do; every company protects its own interests. Think about it...

Do you think they want the masses to know an amazingly simple way to constantly siphon cash out of the world's largest mountain of money?

No way! Remember the scandals of insiders from the tobacco industry blowing the whistle on how cigarettes were deliberately made to be more addictive?

Anyway, I wanted out. I was working too hard, with too much stress and was becoming disillusioned. Sure, I want wealth as much as anyone, but I also wanted an easy life! So I made my plans for escape. I was one of the few trusted with this 'Insider Code' and how to use it on the money-mountain so I quickly saw an obvious way out...

... Access to the 'hidden' money mountain and this Insider Code was all I needed to gain financial security forever! So...

Within a Year of Privately Using The Powerful Secret 'They' Taught Me, And Aged Just 35, I Left My High-Flying Trading Job. I Now 'Work' Just Half an Hour Each Day From Home! May I Show You How to do the Same?

At age just 35, I have now retired from what I call 'normal work'. By 'normal' work I simply mean working for someone else. You have a set start time, a set finish time and a set salary... your personal time and lifestyle is governed by your work and by your boss.

So I got out of what I believed to be an elitist game, shielded from the prying eyes of 'the masses.' I now live a quiet life using the Insider Code whenever I feel like 'getting some cash out', all from my home in Phoenix, Arizona. I set up the whole thing to work on autopilot while I tinker around enjoying life. No sleeping with a computer under my pillow.

But I still don't sleep as well as I should... **Because I want... no, I need... to blow the whistle to someone who'll listen!**

Not everyone will listen. Most people won't *want* to listen.

But I'm hoping you're not 'most people'.

I've tried to get this information exclusively in the right hands... where it will be used to maximum effectiveness. My hope is that those hands are yours.

Why am I doing this? I'll explain later. First, let me demonstrate how powerful this information really is...

Imagine Knowing of a Casino Where the Dealer Tipped His Hand Before You Made Your Move and Didn't Care How Many Times You Beat Him. When Would You Stop Going There?

This is nothing to do with games of chance, but I hope your answer to that question would be a resounding, "NEVER"!! Assuming you're sane that is...

Well, that is a virtually PERFECT analogy of the power of the Insider Code!

It's often said, "The Markets are just a big casino". And it's true. But the important omission in that statement (to keep the masses out!) is the dealer in this casino tips his hand to the select few...

... the insiders who have the cipher to the code.

Such powerful knowledge could make YOU financially free - as it has done for me...

Get Rich With The Insiders... Not Poor Because of Them!

I always remember that famous line from the movie "Wall Street" when trader Gordon Gecko said:

"You're either on the inside or the outside."

Very true...

In the markets I trade, in order for someone to win, someone else has to lose. It's a 'zero sum' game. It's really very simple; **the insiders win at the expense of the outsiders!** In other words, there are the few who know the Insider Code and win, and those that don't... and lose! That's why the Wall Street insiders keep all this a secret; because they need the *outsiders* to lose in order for them to make money!

When you uncover this powerful secret, the very same secret I use each day to live on, you really will see it's EXACTLY like going to a casino where the dealer tips his hand to you before you make your move.

Now, I bet you're dying to know what market I trade using this secret, so let me put you out of your misery!

You Already Know Fortunes Are Made from Trading. The Question is: WHAT Are 'They' Trading Most? (And it's not Shares or Commodities!)

Okay, so what exactly is this money-mountain? I'll tell you, but first I want you to clear your mind of anything you've ever heard about what I'm going to say, because with respect, chances are it's wrong!

Ready? Good. You'll immediately know why I refer to it as the "money-mountain" when I tell you I'm speaking about...

... the currency market. Otherwise known as the foreign exchange markets, or "FOREX" for short.

This market positively DWARFS the stock market and is approaching 2 TRILLION dollars A DAY in transactions. Let me put that in perspective; it's THIRTY times larger than ALL of the American stock market!!

And it's predominantly a professional market; the man on the street doesn't really know much about it or how to get involved in it. That's why I feel like this best kept secret has been 'hidden'... because there's absolutely no reason why the man on the street shouldn't be doing this these days!

Now let's think about this for a second... so that's...

... Thirty times more trading going on than the stock market and mostly investment banks doing it.

Ummm... *Maybe 'they' know something you don't?*

'Rob' Banks Legally... By Cashing in on their "Insider Code"!

Don't you think there's a very good reason for this feeding frenzy? Absolutely! Because it's ultra-lucrative.

Well, it's time for YOU to get in on the act too. Don't think that because big banks are trading this there's no room for you. Quite the contrary! As I'll explain shortly, this Insider Code works PRECISELY because of all this activity from the global investment banks.

We're going to hitch a ride on their back and snatch a slice of the pie right from under their greedy snouts. It really is like robbing banks legally...!

A few hundred years ago, the Spanish Armada constantly sailed back from South America laden with treasure after months of hard work, exploration (or was that exploitation? Whatever!) and traveling. Then quite often, pirates intercepted a few stray ships on the way back and helped themselves to the loot!

Well, that's exactly how I see myself and my few lucky apprentices...

... We will help ourselves to cash on the back of The Establishment...

Slowly Siphon the Cash Out and 'They' Won't Notice

I don't want to draw too much attention to myself though; I've already explained how upset the Establishment would feel if they knew I was blowing the whistle, even if it was only to a few people. So we won't go for the 'big one' by taking big risks. I only take a 'little' - a few hundred dollars each day.

If I took more, I might get noticed. And anyway, that sort of trading mentality is for amateurs... people who like to lose. No, far better for us to siphon the cash out, nice and easy, day by day. I *clear* a tasty 2-3 hundred bucks a day on average...

Now, that may not sound like much, but if you make \$300 a day it equates to six grand a month... NET!!!

How would an extra \$6,000 a month change YOUR life?!

Of course, that's enough to live on and then some. It actually takes me more time to drive to my local bank and get \$300 from the ATM than it does to make this using the Insider Code on the currency markets!

This is how the establishment and investment banks do it... how they WIN consistently. Small, realistic gains... OFTEN. The people who 'go for broke' with the get-rich-quick mentality are the ones who lose their shirts.

The first and foremost rule is NOT to lose! We want the odds in our favor... to minimize risk so the only way is up. And this is yet another great advantage the currency market has...

Imagine if There Were Only 6 Numbers to Choose From When Buying a Lottery Ticket!

Wouldn't that be great?! Of course, the fewer the number of choices, the more likely your chance of success, right?

How many choices are there when buying and selling shares?

Errmm... a LOT! Hundreds...

I enjoy consistent success from trading currencies, because I only have 6 options to choose from. You can see what I mean when I talk about having only 6 lottery numbers to choose from! Except this is even better in a way, because the lottery is pure luck...

... I only have 6 choices AND have a VERY good idea about which choice to make because of the Insider Code.

How are my choices narrowed down so nicely using this 'secret'? I mean, there are lots of different currencies to choose from aren't there?

Well, remember I said we're going to hitch a ride on the back of the big investment banks and how it's the fact that so many of the 'big boys' *are* in this market that gives us the edge? We're pirates raiding The Spanish Armada right...?

You see, the Big Boys only focus on a few currencies- the major ones- leaving me with only 6 choices to trade with each day. So that's all me (and you) will focus on! Makes sense right? Plus, I can pick from those 6 choices any time of day...

What a Lifestyle!

Another great thing about the currency markets is that it's a 24 hour market. You can pick and choose when to use this. No matter whether you work 9 to 5 or on a night shift. You choose your own schedule!

Here's what my 'working' day consists of...

In the evening I spend about 20 minutes deciphering the Insider Code. Once I see it, I set up the correct trade to happen AUTOMATICALLY the next day. That's right, you heard correctly- it's all set up to go on autopilot... no frantic staring at flickering screens and being chained to the computer...!

Sometimes I wake up really late and find I've made the day's money while I slept!

You choose what time of day that happens for you to suit, but that's what I do. All you need is access to a computer hooked up to the internet... and you could be anywhere in the world, at any time... even sunning yourself on holiday!

Oh and by the way, I'll show you on-screen each evening EXACTLY what I'm doing!

More about that later though.

Now, just in case you're still looking at a few hundred bucks a day as chump-change, let me paint the bigger picture for you...

The Double-Up Option

As you become more confident of the consistency of the Insider Code to siphon daily cash out of the currency markets, you'll probably feel more confident about trading with larger amounts. You make your choice; either live on the cash or save it up for a larger chunk...

The numbers are exciting if you leave the money in the pot though. Let me give you a demonstration of the power of compounding:

Let's say you make \$300 a day and instead of spending it, you reinvest the profits to trade with more. Let's say you double your trading stake each month for 6 months starting with the minimum...

... You'd have \$378,000 clear in your bank account after just 6 months!

But please don't look at this as some lame get-rich-quick scheme or game of chance; they never work. I want you to understand what I'm offering here is real hand-holding to create a consistent, automated income which never dies. When it's done right, It's like having your own personal ATM!

Once you learn and apply the secret Insider Code I will teach you, you'll never want for anything again...

A Lifelong Income

How much would you expect to pay for classified wealth-building information like this? It's hard to put a price on freedom and happiness isn't it?

I can tell you from experience, that's EXACTLY what this gives you. You would be able to support your loved ones and have the time to enjoy being with them... do the things YOU want to do... to finally move out of the dark tunnel of wage-slavery and into the light...

...Regardless of what world economies and markets do!

Who Cares What the Stock Market Does?!

As long as currencies exist (i.e. forever!) they will fluctuate up OR down... and that's all I care about. Recessions, terrorist attacks, stock market crashes... none of that takes away this fantastic livelihood!

No sleepless nights waiting for shares you own to turn around... shares which may have crashed for reasons entirely out of your control or scope of knowledge. We will use surgical precision strikes... quick in-and-out trades and be done for the day.

It scares me how many peoples' pensions are tied to what is a scarily overvalued stock market... all through the investment banks who are mostly trading *currencies* instead!

Once again, let me reassure you there is no reason why the currency markets should be exclusively the domain of the world banks. That's just an illusion they spin to keep all the goodies for themselves!

No Experience or Knowledge and VERY Little Start-Up Capital Needed

And I'm going to prove it...

With my assistance, you do NOT need any trading experience whatsoever and I assume you have no knowledge about currency markets or how to trade them. If you're completely clueless about any of this stuff then all the better actually.

What's more, you really can do this with VERY little trading capital. Using my low-start method you can begin with as little as a hundred dollars!

AND, don't think I'm trading with a fat wad of cash to make my few hundred dollars a day; you could trade at the very same level as me for just a couple of grand! Yes, using my system, that really is all you need to get going and CLEAR an average of \$2-300 a day in your pocket!

So are you up for this? Great! How do you get going? Well, to quote a famous line from "The Italian Job"... *"We're a team... and that means you do exactly what I tell you..."*

Relax and Let Me Reveal *The Insider Code* on Screen at Home

I'd like to take YOU along for the ride of a lifetime by teaching you quickly in the comfort of your home, how you can do exactly what I do by following my lead and make a quick and simple extra few grand a month.

I'm a financial professional and I want to do this properly. So I've used the very latest technology to demonstrate **"The Insider Code"** by means of a comprehensive CD-ROM set with telephone and web training and support. This includes a daily on-screen demonstration of what I myself am doing (I'll explain more about this shortly).

I've spent *years* painstakingly creating what I believe to be the most powerful trading tool on the planet.

You'll need access to a computer with an internet connection. You just pop in the CD-ROMs one by one and sit back and relax while I walk you through the entire process live on-screen- you'll actually see me trading!

I've gone to incredible lengths to make this probably the best, most easy to understand demonstration you've seen about ANYTHING. It really will blow you away with its simplicity and visual guidance.

Don't think that when your kit arrives you'll be overwhelmed with books, manuals, videos etc. etc... I've made everything embarrassingly simple; you just play the CD-ROMs one after the other and follow my easy instructions. I'm going to show you in real-time exactly what I do and how I do it so you can copy me.

No dry 'theory' to plough through; just relax, watch and listen!

I'm sure you have a few questions after this briefing so I've tried to anticipate what they might be and answer them below...

Your Questions Answered:

Q: "So WHY are you blowing the whistle instead of just keeping the Insider Code and using it yourself?"

Two reasons...

1. I *do* use it myself- every day! And, I'm doing these trades anyway so why not take a few people along for the ride? They get the chance to make money (by trading with the Insider Code) and I make money (by showing them how to use it). Simple. Everyone's happy.
2. As I've said, there's an element of my conscience nagging at me too. I don't like the fact this has effectively been 'hidden' from the public by the elite few.

Q: "I don't want to take any big risks."

What makes you think I do?? Listen, the establishment fat-cats didn't get fat by losing money! Big risks are for amateurs; it's OTHER PEOPLE taking big risks, looking for the 'big one' stuck in the get-rich-quick mentality that make it such LOW risk for us! We're *not* trying to 'get rich' here. Just get an easy few grand a month for almost no effort.

The losers are the ones who don't follow a strict and reliable system which extracts small,

but regular amounts with surgical precision. That's why we don't go for more than a few hundred each day.

But if you can't handle even a small amount of risk, I think you should consider staying out of the market altogether - in fact, **stay out of every other investment in the world.** Just stick at a regular job until it's time to retire - and pray your pension will cover you.

But I'm confident that if you use this properly, you're going to have to try very, VERY hard to lose money; i.e. by NOT following my simple instructions! Most of the time I win. Sometimes I break-even or lose a little, but ultimately, I come out on top*

Q: "Okay, so you're only going for small, regular profits. But won't dealing charges wipe out those gains?"

No. This is only an issue for people who are 'over-trading'- this is one way brokerages scalp amateurs. I CLEAR around \$2-300 a day using this myself.

Q: "It sounds exclusive. Isn't it a nightmare opening an account and having enough capital?"

Not at all. It's been deliberately made to sound exclusive so the banks can keep you out of it. I've already said you can start trading at the same level as me for just a couple of grand and you can set up a trading account in ten minutes!

Q: "How can this make money on a day when the market falls badly?"

Well, we're not even trading shares for a start! We're trading currencies (the Money Mountain) using a code which equates to a dealer in a casino tipping his hand BEFORE you make your move. If ANY market move affects the currency market, it will be reflected in the hand the 'dealer' shows us!

Q: "Does this involve using a load of technical mumbo-jumbo and complicated charts?"

Let me dispel a myth; technical analysis only accounts for about 10-15% of what trading is really about. Any pro will tell you this. This isn't some silly system which analyses past data or whatever... this is how it's really done by the biggest players in the world!

Q: "How do I know I'll really be able to make money with this?"

Just take a look at my unique guarantee later on. You can 'paper-trade' with it using none of your own money until you're happy it works within a month of receiving your kit. Remember, we're going for a modest return on a daily basis which means low risk. That's another reason why we only siphon-off a few hundred a day.

Q: "Do I have to trade every single day to make this work?"

No. This is not a system which relies on your trading every day in the hope that the good trades will statistically outweigh the bad ones and overall you come out slightly on top! **The aim here is to win EVERY trade!** At worst break-even - and all on a single day. There's no sleeping with a computer under your pillow - and you pick which days you want to trade.

Q: "I've tried trading systems before and they never work."

I totally agree. Most trading systems are complete and utter nonsense because frankly, the people behind them don't know what they're doing and/or don't even use it themselves.

This is different. Why? Because it works!!! I use it!

Remember, I'm an ex-hedge fund trader who uses this himself each and every day and I will gladly prove this to you.

Q: "How does the system operate and what does the kit include?"

You just need access to a computer which can play CD-ROMs (I haven't seen a recent computer which couldn't!) and has an internet connection.

The kit comprises a series of CD-ROMs which take you through the whole process in minute detail assuming you have zero prior knowledge of trading. On the CD-ROMs you'll hear me and see me walking you through exactly what I do to make a simple \$2-300 a day on average using the Insider Code to siphon cash out of the world's 'hidden' money-mountain.

Once you've learned everything, you'll spend about 20 minutes setting up each trade ready for the next day's profits to happen automatically. **After watching me set up my own trade for the next day!**

Q: "Can anyone do this?"

Any sane person can, yes! You don't need a degree in math or any experience or qualifications at all. I've assumed you're starting with zero knowledge. In short, there should be no reason why you can't make great profits and have fun doing it.

Once you start watching the first CD-ROM you'll quickly realize why I keep on about how easy to follow I've made this!

Q: "What qualities do I need as an individual?"

The ability to do as you're told to by me! Watch me using the system in real time every day. Then when you're ready, if you can follow my simple instructions, this can make you the sort of money we've been discussing. If you can't do that, please do not apply...

Q: "Can I speak to someone if I'm unsure about how to use the system?" You bet...!

Unlimited Telephone Training and Support

Again, apologies for the 'cloak and dagger' at this stage, but I'm sure you understand why. However, once admitted to my circle of trust you'll have our telephone number and email address and have *unlimited* access to my first class training and support... !

It cannot get better than that. You aren't simply left to get on with it; I'll be holding your hand all the way.

For the entire trading-week, I'll be walking you through the entire process. Whatever it takes, so you too can retire from normal work within a year.

But it doesn't end there though...

Follow My Lead Each Evening on Screen!

Each evening, you'll be able to access an exclusive and secret website where I'll show you in real time the trade I'm setting up for the next day.

Every single evening you will see me walking the talk in real-time!

Right from the first day you receive your kit, relax and watch as I prove everything to you as it happens on screen.

Ummm... I wonder why no-one else does that! Could it be they're not THAT confident about their so-called 'profitable' systems?

Were I not 110% confident this can make you steady, automatic profits EVERY DAY, clearly I would not be offering this... or I would embarrass myself!

And don't go looking for the 'catch' because there isn't one. Each day you'll see exactly what I'm doing. Soon you should be able to do the same after my comprehensive and personalized instruction.

I will demonstrate exactly how I use the signal to 'rob' banks legally and consistently... and even better, how I set the whole thing up to happen on autopilot...

Come Home to Automated Cash Each Day!

Imagine coming home a few hundred dollars richer each day... the whole thing happened while you were out! All because you followed my simple instruction and spent 20 minutes the evening before, setting up the trade. You could have been on the golf course all day and *still* made money!

This isn't hype. The currency market tips its hand BEFORE the trading session so we can look for the Insider Code the evening before! And I'll show you how to quickly and simply get online and make the trade open and close at a predetermined level.

You can stay and watch if you like, but why bother when you could be out having fun instead?

I mean, that's what life's really about isn't it? Doing what you really want to. Time really is the most precious resource we have... that's what I cherish most and designed "**The Insider Code**" with that firmly in mind.

The Gateway to Your Share of the Hugest Heap of Money on the Planet

"The Insider Code" is nothing short of a predictable lifelong income if used correctly, so how do you value that?

As you'll clearly see when you receive your kit, I pride myself on delivering value for money. The price I decided upon in the end was \$1977 (plus shipping). There's no silly gimmick bonuses to pad it out; what I've told you already will hopefully mean you don't need to be bribed with nonsense like that; I only want to work with serious people who know an incredible opportunity when it hits them.

I hope you'll see this as an investment in your future, so my aim is to help you get money in YOUR pocket as quickly as possible. There's no reason why you can't double your money within 30 days of receiving your kit and then use it as a perpetual ATM for you and your loved ones. Just think... follow the simple instructions and by the time your card statement arrives you'll not only be able to pay it off in full; you could have a fat chunk of money in your pocket also!

I'm fully convinced that once you see the first CD-ROM you'll know you're at a turning point in your life, so I want nothing to stand in the way of that...

See for Yourself at My Risk!

Now, I KNOW first hand this works and that it will work for you too if you're lucky enough to secure a place in time. All you need to do is follow my simple instructions on your screen at home. I've taken immense time and trouble to construct a truly amazing visual course anyone can follow.

As I've said, this is the highly coveted 'secret' the elite use to skim the cream off the mountain of money which is the currency markets, so there's no question about whether this works or not!

However, I understand you might need a little reassurance and perhaps to test drive this for yourself first?

I thought so. And here it is...

100% Guaranteed!!

Go ahead and try it out for yourself at my risk! **"The Insider Code"** can quickly be put into practice by watching the easy-to-follow CDs- 30 days is more than sufficient for you to see this is for REAL! So, provided you manage to secure a place in my 'Circle of Trust' (see later), there's a 30-day trial period which starts when you receive your kit. If, for ANY reason you wish to return it, send it back in ANY condition, within 30 days of receipt and I will refund you in full. Every cent (less shipping and handling) without any fuss. I shall then simply offer your place to the next person on the waiting list, so it's absolutely no problem for me.

And remember, 30 days is not only enough time for you to actually test this out... it's enough time to double your money too!

So now you have absolutely nothing to lose. I want you to have total peace of mind by moving forward now to seize something which finally, is the answer to your prayers. The second you play the first disc you'll just know this is for real... your gut instinct is always right.

Sounds good so far? It should; it's the proposal of a lifetime. Okay, **but...**

**... Now the Bad News:
Only So Much Room in My Circle of Trust.**

Sorry about that. It's not that there's only so much money in the pot to go around (far from it!!), but rather these 2 reasons...

1. As you can imagine, giving unlimited, telephone support and training must severely limit the numbers I invite to get in on this. There are only so many hours in the week, and my priority is to give first class service to those lucky people without compromise... AND trade with this myself! I sincerely hope you're one of the few to make it.
2. The whole world can't know about this. I don't want my whistle-blowing to get back to the people guarding the 'honey-pot.'

I hope you understand. Now, if you're FAST- and I mean, you act NOW, today, you should have no problem in securing a place. This isn't some cheap sales trick either- the reasons are genuine as I've explained. Once the doors are closed, that's it.

By the way, if you don't manage to get a place, ***I would be extremely grateful if you still kept this invitation close to your chest.*** Thank you.

You have a one-time window of opportunity before you at this moment and I urge you to take it...

Your Path to the 'Hidden' Money-Mountain Awaits!

You probably see this invitation as a little different from the 'norm'. Well, that's because this is for real! I've stood by for years now and watched as all the get-rich-quick garbage and sorry excuses for trading systems have been peddled by people who had no clue. We used to laugh at such 'systems' in the investment bank! Remember, I'm an ex-pro and do this for a living, so I know what I'm talking about!

Sorry to be harsh, but this is clearly VERY different from anything you've seen, or are ever likely to see, as you must now realize. So don't delay... simply click below. to use the 100% safe and secure online reservation NOW... to ensure you make it into my Circle of Trust for an action-packed ride.

I greatly look forward to speaking to you on your screen at home, and on the phone, during this, your last year of slavery for "The Man".

Confidentially yours,

Mac "X"

The Whistleblower

P.S. On the easy-to-follow CDs I take you on a proven path to ***retirement within a year.*** Using "The Insider Code"- the HIGHLY privileged secret I was given by the establishment you could retire within a year after using it and the 'hidden' mountain of money it exploits mercilessly.

P.P.S. As I've said, don't worry if you're sick to death of stocks and shares because this has NOTHING to do with them. Try something different at my risk; after all, doing the same thing each day and expecting different results is insanity!
